## **Granite Honored with 2023 INTERNET TELEPHONY SD-WAN Product of the Year Award**

Granite's 'Built to Order' SD-WAN Recognized for Exceptional Customer-First Innovation

QUINCY, Massachusetts – April 12, 2023 – [Granite Telecommunications](#), a \$1.8 billion provider of communications and technology solutions to multilocation businesses and government agencies, announced that [TMC](#), a global, integrated media company, has awarded Granite's "Built to Order" SD-WAN a 2023 INTERNET TELEPHONY SD-WAN Product of the Year Award.

SD-WAN is the fastest-growing and most disruptive network technology in years, giving businesses redundancy and quality of service using widely available and low-cost broadband. But Granite recognized that SD-WAN is not a one-size-fits-all solution. Depending on their requirements, companies may benefit from a variety of solutions or even more than one.

Granite offers "Built to Order" access-agnostic SD-WAN, leveraging the best connections and technologies in the industry to match a customer's performance, security and price requirements.

"With Granite's custom design approach, our customers get the secure and visible network solution their businesses require, backed by Granite's customer-first approach to technology and service," said Granite CEO Rob Hale. "In addition to best-in-class technology, Granite's SD-WAN solutions also provide the convenience of 'one provider, one support team,' that our customers value."

The INTERNET TELEPHONY SD-WAN Product of the Year Awards are given to companies that demonstrate the innovation, vision, and execution to deliver software-based networking tools to support different and unique communities of interest.

"Congratulations to Granite for receiving a 2023 INTERNET TELEPHONY SD-WAN Product of the Year Award," said TMC CEO [Rich Tehrani](#). "Granite's SD-WAN has demonstrated true innovation and is leading the way for Software Defined Wide Area Network. I look forward to continued excellence from Granite in 2023 and beyond."

## **ABOUT GRANITE**

Granite delivers advanced communications and technology solutions to businesses and government agencies throughout the United States and Canada. The \$1.8 billion company serves more than two-thirds of Fortune 100 companies and has 1.75 million voice and data lines under management, supporting more than 650,000 locations. Founded in 2002, Granite has grown to be one of the largest competitive telecommunications carriers in the U.S. by simplifying sourcing and management of voice, data and cellular service with a single point of contact and consolidated invoicing for all locations nationwide. Today, Granite supports customers with a wide range of services, including access, UCaaS, mobile voice and data, and MSP solutions for SD-WAN, monitoring and network management. Granite employs more than 2,250 people at its headquarters in Quincy, Massachusetts and 11 regional offices nationwide. For more information, visit [www.granitenet.com](http://www.granitenet.com).
