COALITION
FOR COLLEGE COST SAVINGS

Strength Through Collaboration

Why Membership Matters

The average private, independent college or university is often under-served in the purchasing marketplace because its total consumption of supplies, equipment, and services, as a single institution, is not sufficiently large to result in consistently competitive pricing. By combining a single institution's purchase volume with hundreds of similar institutions throughout the country, the created market strength of private colleges enables competitive leverage rivaled only by the largest of corporations.

The Coalition for College Cost Savings **(The Coalition)** is a comprehensive and collaborative purchasing consortium focused exclusively on independent private higher education.

Our goals are to leverage the collective buying power of private colleges to reduce operating costs, improve the efficiency of internal procedures and ultimately lower the cost of delivering education.

Coalition Benefits

- **Exclusively Focused on private higher education** with contracts available to all member organizations and no cost to member schools.
- **Performance rebates** available on selected agreements. As a non-profit organization, all monies earned in rebates through The Coalition are returned to members after operating expenses are covered.
- **Dual Focus** on cost reduction and operational process change.
- **Access to cost savings** by institutions regardless of size. Consolidated volume of all members creates market strength.
- **Feature-rich contracts** would be unavailable individually.

Coalition Membership

State-level private college associations make up the membership of the Coalition. Access to Coalition contracts is granted to colleges and universities through a membership with their state-level association. Check our website to see if your state's private college association is already a Coalition member.
