Coalition Energy Sustainability Program

Navigate Your Campus's Pathway to Sustainability

About the Energy Sustainability Program

The Energy Sustainability Program (ESP) is a collaborative effort by the Coalition for College Cost Savings, First American Education Finance, Ecosystem Energy Services, and Solar Financing Solutions.

The ESP provides private, nonprofit schools with resources to move their campuses towards a sustainable energy environment, supporting goals such as decarbonization, reduced energy expenses, improved resiliency, deferred maintenance, and other campus objectives.

Full-Solution Support from the ESP Team

The ESP team is made up of experts who have years of experience working alongside higher education institutions on energy and sustainability initiatives.

Ecosystem Energy Services

✓ Technical expertise

✓ Provides strategic assessment for qualified institutions

First American Education Finance

✓ Custom capital solutions

✓ Offers financing for projects identified from strategic assessment process

Solar Financing Solutions

✓ Program management

✓ Oversees program communications and processes

ESP Process

Develop campus-specific energy & sustainability programs with a five-part approach:

1 **Engagement & Alignment:** Meet with stakeholders and frame goals

2 **Education:** Review energy & sustainability data together

3 **Clarity:** Identify potential pathways with high-level financial and performance estimates

4 **Actionable Roadmap:** Determine best path forward and present final recommendations

5 **Implementation:** Design, build, finance, and launch projects identified

Proud Members of the ESP Team:
